

Team Neutrino

May-June

Graphics and Programming

This June, graphics training camp taught members what the graphics subteam does, as well as some skills that they will need for the season. Programming camp taught members how to be better programmers in Java.

Empower, Enrich, Excel (EEE)

Team Neutrino members volunteered at EEE for three weeks this June. We helped teach K-8th graders in the Mini Makers Class and Lego Mindstorms Class at Sawyer and Meeker Elementary. This taught kids about STEM skills and Lego Mindstorms robots.

Sponsor Visits

In June we visited one of our longest supporters, CIT Transportation. They have donated transportation to competitions since 2012. We also visited one of our newest sponsors, Ames-based Renewable Energy Group (REG).

Kickball!

To help introduce the new members to the team, one of our members came up with the idea to have a team game of kickball. This event helped boost team spirit in a fun and engaging manner.
