

# Team Neutrino

## November-December

### ISU Research Park

At the ISU Research Park the team got the chance to talk to potential sponsors. It was a great opportunity for the new members of the team to get experience talking to new people about what Team Neutrino does.

IOWA STATE UNIVERSITY  
College of Engineering

MANUFACTURING

2018

### Mock Kickoff

Team Neutrino had a mock kickoff to help the members of the team understand how the actual kickoff would work. The team worked in small groups to see how they wanted their robot to work.

### Guest Speaker

The team had a guest speaker come from John Deere and talk to them about the challenges of the season that they will face. He talked to them about some of the challenges that he and his teams have faced.

### Programming

The returning members of our team taught New-trinos the basics of robot programming, programmed the mini bot, and they are working on making a graphical program to create autonomous for the bot.

Coming Next Time: 2019 Season Kickoff
